

Introduction to Machine Learning and **Types of Data in used in Machine Learning**

QUESTION 1

Fill in the blanks (2/2 MARKS)

Machine Learning is the ability of machines to _____ from the past data, without being explicitly programmed.

Type your answer here

learn

Well done! Correct answer.

Solution

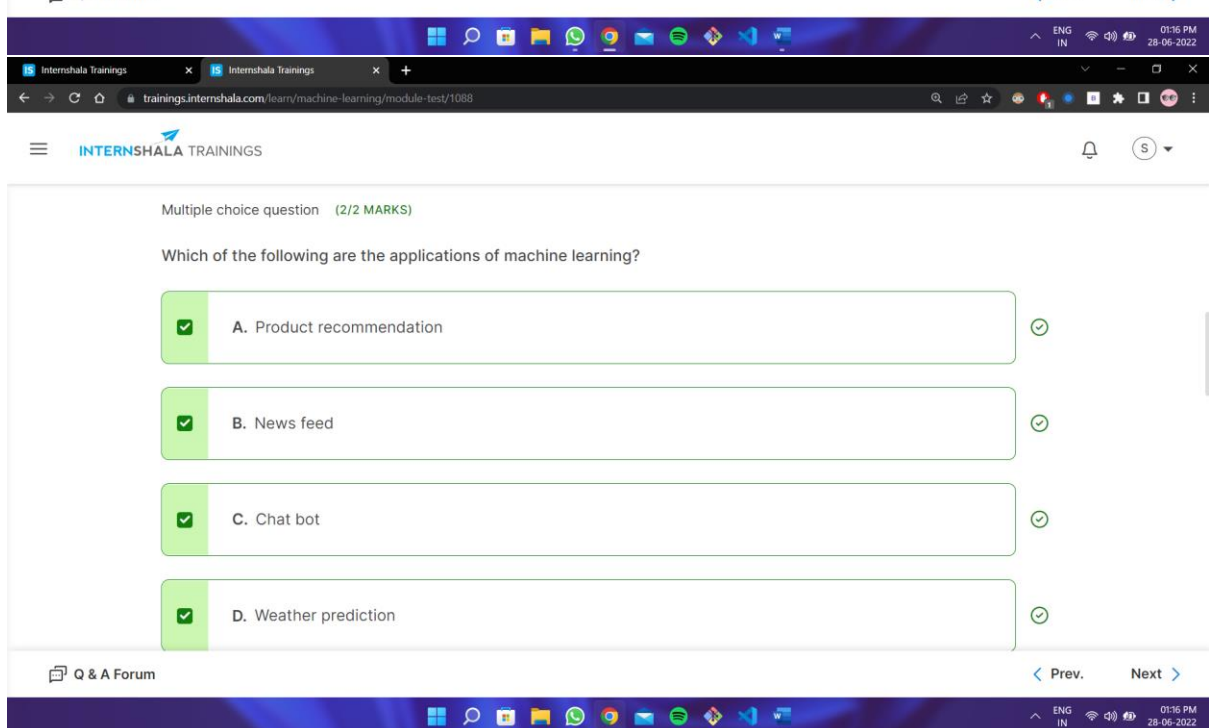

learn

Explanation

Machine Learning is the ability of machines to learn from the past data, without being explicitly programmed.

QUESTION 5

Multiple choice question (2/2 MARKS)

Which of the following are the two types of machine learning?

- ☒ A. Supervised learning
- ☐ B. Categorical learning
- ☐ C. Empowered learning
- ☒ D. Unsupervised learning

Excellent! Correct answer.

QUESTION 6

Multiple choice question (2/2 MARKS)

Which of the following statements best explains supervised learning?

- ☐ A. In supervised learning, the program is supervised by the programmer.
- ☐ B. In supervised learning, the programmer is supervised by past data.
- ☐ C. In supervised learning, the program learns from the past unlabelled data.
- ☒ D. In supervised learning, the program learns from the past labeled data.

QUESTION 7

Multiple choice question (1/1 MARKS)

What do you understand by a ML model?

- ☐ A. A model is a paper sketch that depicts how the machine learning process takes place
- ☐ B. A model is a three dimensional model of how the final machine learning project would look like
- ☒ C. A model is a program that learns from the data provided to it
- ☐ D. None of the above

✔ Perfect! You got this right.

Multiple choice question (0/2 MARKS)

Below we have 2 statements, choose the correct option.

Statement 1: Supervised learning is of two types.

Statement 2: Classification deals with continuous variables. Whereas, regression deals with categorical variables.

- ☒ A. Only statement 1 is correct
- ☐ B. Only statement 2 is correct
- ☐ C. Both statement 1 and 2 are correct
- ☐ D. Neither statement 1 or 2 is correct

✘ Incorrect answer.

Explanation

Following are the variables that are numerical in nature:

- 1.Age
- 2.Patient's weight
- 3.Complexity level
- 4.Body temperature
- 5.Blood pressure
- 6.Heart rate
- 7.Amount of dose given
- 8.Time since patient is suffering from the disease

QUESTION 3 (0/2 MARK)

List the number of variables which are categorical in nature.

☒ A. 3

ENG IN

01:24 PM 28-06-2022

D. 9

Solution

Correct answer : B

Your answer : A

Explanation

Following are the variables that are categorical in nature:

1. Patient name

2. Gender

3. Location

4. Hospital name

5. Type of disease

QUESTION 4 (2/2 MARK)

List a variable which should be discrete in nature.

QUESTION 4 (2/2 MARK)

List a variable which should be discrete in nature.

☒ A. Complexity level

☐ B. Body temperature

☐ C. Heart rate

☐ D. Blood pressure

Solution

Correct answer : A

Your answer : A

Q & A Forum

QUESTION 5 (2/2 MARK)

List the number of nominal variables.

☐ A. 6

☐ B. 7

☐ C. 9

☒ D. 4

Solution

Correct answer : D

Q & A Forum

< Prev. Next >

☐ B. 7

☐ C. 9

☒ D. 4

Solution

Correct answer : D

Your answer : D

Explanation

(Gender, Location, Hospital name, Type of disease) - these variables do not have any order within themselves.

QUESTION 6 (2/2 MARK)

Q & A Forum

< Prev. Next >

(Gender, Location, Hospital name, Type of disease) - these variables do not have any order within themselves.

QUESTION 6 (2/2 MARK)

List one variable which is likely to be discrete but ordinal in nature.

☐ A. Body temperature

☐ B. Blood pressure

☒ C. Complexity level

☐ D. Hospital name

Solution

Q & A Forum

< Prev. Next >

☐ B. Blood pressure

☒ C. Complexity level

☐ D. Hospital name

Solution

Correct answer : C

Your answer : C

Explanation

Complexity level by itself describes that there is going to be some order within the variable.

❌ 1/5 answers are incorrect.

QUESTION 9

Arrange in order (4/4 MARKS)

Arrange the following in the right order.

Descriptive analysis

Diagnostic analysis

Predictive analysis

Prescriptive analysis

Well done! Correct answer.

Explanation

We first start by DESCRIBING the data at hand. Which is followed by DIAGNOSING issues we found in the first stage. Thirdly, we perform PREDICTIONS to look over the future scenario. Lastly, depending upon the previous three, we propose PRESCRIPTIONS for future actions.
